

HOW COOPERATIVES REBUILD BETTER TOGETHER?

Data from the international development cooperation initiatives of the cooperatives' organizations of Legacoop

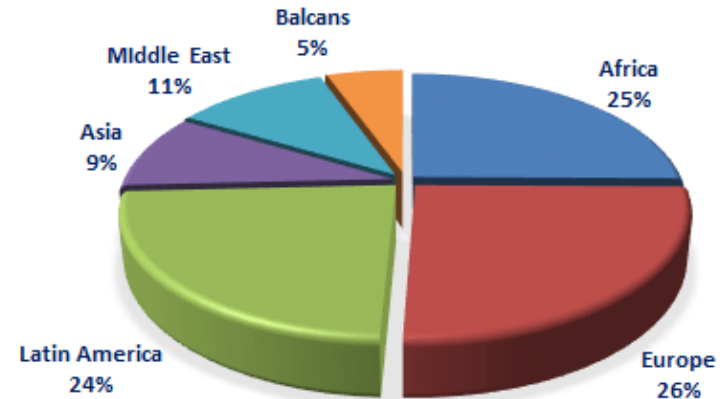

INTERNATIONAL COOPERATION FOR #REBUILDINGBETTERTOGETHER

THE DEVELOPMENT DATA PLATFORM

The DDP (<https://ddp.haliéus.it/>) collects and presents data on international cooperation projects implemented by the cooperative organizations of Legacoop.

Developed by Haliéus, with the technical support of Gnucoop, the Platform proposes an open approach to data, based on the sharing of information to facilitate the exchange of good practices and the strengthening of knowledge. So far, the DDP gathers data from **218 projects** implemented in **87 different Countries**, by **62 cooperative organizations**.

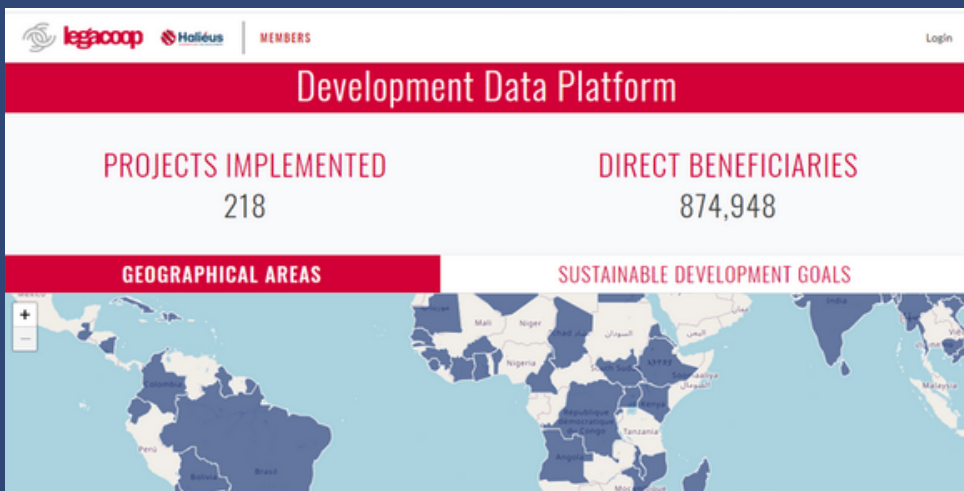

PROJECTS' TOTAL VALUE BY REGION

The total value of the projects reported amounts to more than € 76 million, with an average size per project of around € 700.000. In most cases, the cooperative organizations reporting the project manages only part of the overall project budget, working in synergy with other CSOs.

In terms of value, the projects are evenly distributed between the different Regions, with a relevant focus on Africa, Latin America and Europe (mainly eastern Europe).

The projects contributing to the health sector summed up to over €21 million in the period considered, working on all five continents and benefiting no less than 1.2 million people.

International Day of Cooperatives
 Rebuild better together
 3 July 2021

The International Day of Cooperatives 2021 (#CoopsDay) is celebrated as *Rebuild better together*.

Cooperatives around the world are meeting the COVID-19 pandemic crisis with solidarity and resilience and offering communities a people-centred and environmentally just recovery.

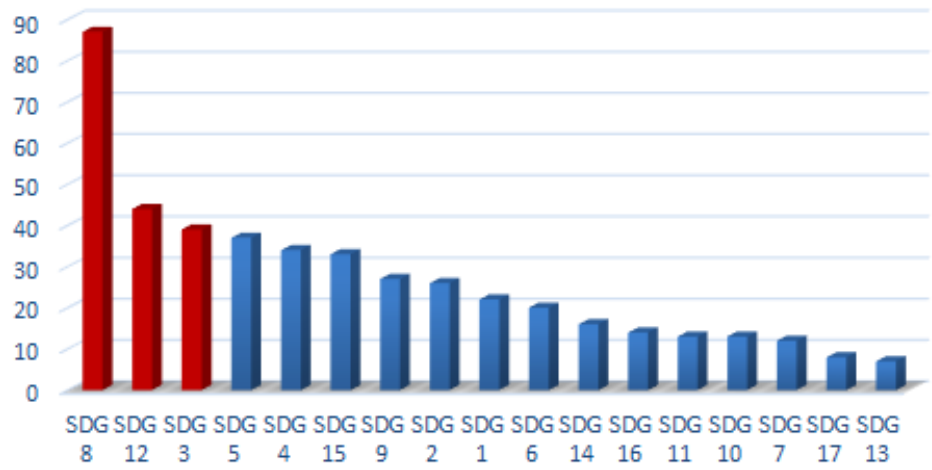

The projects gathered in the DDP give clear indications on how the cooperative movement is committed toward the Agenda 2030 and the SDGs more relevant to rebuild better together.

In the health sector 12 different cooperative organizations realized 39 projects, contributing to Goal 3 (Good health and well being).

These projects are evenly distributed over the time period of reference, confirming the interest of Legacoop's cooperatives organizations in the topic of health, well before the pandemic that clearly catalysed so many efforts in the last two years.

At the same time, several projects focused on SDG 8 (Decent work and economic growth) and SDG12 (Sustainable Production and Consumption), key pillars for #rebuildingbettertogether

N° of projects in the DDP by SDG

FUTURE DEVELOPMENTS OF THE DDP

Sharing data and information is an essential driver of the growth and increase the impact of international cooperation interventions.

For this reason, we plan to upgrade the platform both extensively, by involving an increasing number of cooperative organizations, and intensively, by going deeper into the analysis of the evidence contained in the data.

In particular analyzing the correlations between the most successful interventions, in order to further strengthen the impacts achieved.
